

How to Clean Polywood

SLING FABRIC

Extend the life of your outdoor sling fabrics with this easy semi-annual cleaning method.

SUPPLIES NEEDED

- Whisk broom
- Mild dish soap
- 5-gallon plastic bucket
- Sponge or washcloth
- Liquid bleach

INSTRUCTIONS

- Remove loose dirt with the whisk broom.
- Mix 1 Tbsp dish soap and 2 Tbsp bleach per 1 gallon of water. (For 5 gallons of water, use 5 Tbsp dish soap and 10 Tbsp bleach.)
- Use the sponge or cloth to scrub the mixture onto all parts of the sling fabric.
- Thoroughly rinse the material right away and let it air-dry.

AVOID OIL-BASED PRODUCTS

Oil-based products can damage outdoor sling fabric and make it age faster. If direct contact occurs, clean it off right away using the following method.

SUPPLIES NEEDED

- Paper towel
- Corn starch
- Dry vacuum cleaner or straight edge

INSTRUCTIONS

- Blot any excess oil with paper towels—do not rub.
- Apply cornstarch to the stain and let it sit for 10–15 minutes.
- Remove the corn starch using the dry vacuum or straight edge.
- Repeat the process until all the oil has been absorbed.
